## DAILY MINING JOURNAL.

OVANDO J. HOLLISTER, Editor and Proprietor

SATURDAY EVENING, JANUARY 13, 1866.

### Reconstruction.

A writer in the *News*, considering this subject, concludes that the Southern States accomplished secession and that therefore they are out of the Union. In point of fact this is true, but is it wise for us to carry it in that light? Will it not perpetuate that hostile feeling between the sections which has cost us so dearly? It may be right to demand guarantees for the future and all that, but Stevens and Sumner and their followers must contemplate that these Territories will eventually become States. And whether that is next summer or twenty summers hence, they can equally, if so minded, abrogate all the distasteful measures they have been forced to accept by the military power of the United States. We have to trust the South, sometime, and why not now, while it is decimated and devastated as well as at some future time, when a new generation will be on the stage. It is well known that the magnitude and nature of the late rebellion forced us to regard the rebels as belligerents, but President Lincoln nevertheless insisted that secession was impossible and the country sustained him in it. President Johnson has merely continued Mr. Lincoln's policy in his measures toward reconstruction, and three or four months ago, both the great political parties were trying to outvie each other in professions of devotion to that policy. What has since happened, to make it a blunder or a crime? We apprehend it would be difficult to tell. We run some risks in restoring to the late rebel states their old position and rights in the Union; but are they greater than we ran in at this time dividing the great national party and thus inevitably throwing power into the hands of the Southern party in the North? Or than we run in holding eleven states under military rule? The course of the leading Radicals involves too deep a reform or revolution rather in the feelings and opinions of the North to be accomplished or even attempted at once. It involves nothing less than the absolute political equality of the white and black races. The North is not ready for that, nor is it certain it ever will be. In the three or four States where it has been tried it has [illegible] out all the Whites who can get away. The soul of the white man revolts at the thought, and nothing but necessity will force him to submit to it.

If Sumner and Stevens carry the day in Congress, the whole question in all its length and breadth will come before the country, at the next Congressional election, and the result will be that President Johnson will be sustained. Of course the bulk of this party will be what it has been during the war, southern in sympathy. The Southerners will be admitted, and having a majority in the North, and being embittered by the extreme action of the radicals, Heaven only knows what they will do. To re-establish slavery and provide for the payment of the rebel State and Confederate debts and losses of the war will be the first steps. Doubtless the North would resort to revolution rather than submit, and anarchy would follow. The only hope of the country is in the unity and strength of the party which fought the late war. Let that party stand together and pursue such a course as shall give the Northern people cause to confide in their integrity and judgment, and they can go to the extremest length of magnanimity in their treatment of the South without endangering the interests of the country. But attempt to *force* negro equality, which is the sum and substance of the whole movement of the extremists in Congress, upon the American people, either North or South, and it throws the late rebels and their Northern allies uppermost in spite of any power on earth. We hope the President will be sustained, and that Congress will not adjourn until the Southern representatives are admitted.

### Meeting of the citizens of Clear Creek County—Protest against Senator Sherman's Bill.

At a meeting of the citizens of Empire held on the evening of January 5th, 1865, on motion of H C Cowles, J E. Leeper, Esq., was elected President, Gen. T. G Morehead, Vice-President, and Major J. A McPherson and W. W Ware, Secretaries.

L. H Shepard, Esq., offered the following preamble and resolutions which were adopted.

*Whereas*, This meeting is assembled to take into consideration a bill introduced into the U. S Senate by the Hon John Sherman, entitled a bill for the survey and sale of the mineral lands of the United States, which of course includes all mineral lands of Colorado, and.

*Whereas*, It is believed, should said bill become a law it would materially injure the citizens of Colorado, Therefore

*Resolved*, That the President of this meeting appoint a committee of eight to draft a suitable protest and such memorial to Congress and to the Hon John Sherman as in the opinion of such committee shall be proper, and report the same to this meeting for adoption.

The President appointed L. H Shepard, H C. Cowles, C. B. Patterson, John Collum, Gen T. G. Morehead, S P. Allen, Mr. Tucker, and Wm Coley such committee. They retired, and after due deliberation returned and presented as their report a memorial to the Hon John Sherman and a protest to Congress, both of which were *unanimously adopted*. The following is the protest:

*To the Honorable the Senate and House of Representatives in Congress assembled:*

We, the citizens of Empire, Union District, Clear Creek County, Colorado, in Mass Meeting assembled—Would most respectfully submit for the consideration of your honorable body the following remonstrance:

Whereas the Hon. John Sherman in the Senate of the United States has introduced a bill entitled a bill for the survey and sale of the mineral lands of the United States including all the mineral region of Colorado.

And whereas, in the opinion of this meeting, should said bill pass and become a law, it would not only materially injure the present and future prosperity of our Territory, and in the end fail to produce such an amount of revenue to the government as the people of the several States are by its provisions led to expect, but certain ruin and bring to poverty the inhabitants of Colorado by putting into the hands of speculators and capitalists all the mines now discovered or hereafter to be discovered,

Therefore we herewith respectfully present our remonstrance against the passage of said bill, and against the same becoming a law for the following reasons, *to-wit*:

1. The present inhabitants—being mostly POOR MEN who emigrated to these mountains, braving the hardships of a miner's trip, hostile Indians, hunger and cold—first discovered that gold and silver existed on the eastern slope of the Rocky Mountains, and have spent six years of the most severe kind of labor in exploring the Indian country and developing the mines, thus laying a foundation for prosperity and usefulness not yet realized. More than this—actuated by patriotic motives, they have by their toil and privations, *unequaled* by any other class of pioneers, *made known* to the Government what it before was ignorant of and but for these men would have remained in ignorance, of—that the precious metals exist in large quantities in these mountains. These men, without money, and whose entire possessions consist in the [illegible] second section of the bill will lose all their hard earnings for the past *five* or *six* years accumulated, by being forced into competition with speculators at the sale of their own property, taken from them by the government; thus taking from the poor laborer and giving to the rich speculator, making the one a millionaire and compelling the other to earn the daily bread for his family at such wages *per diem* as his competitor may thereafter see fit to give.

2. The survey and division of our lands which contain mineral, except coal and salt, as contemplated in section *three* of the bill, is impracticable. By a sale by such division and in such parcels, all the mines of gold, silver, and platinum in this Territory would fall into the hands of speculators, while the laboring prospector and miner would be unable to obtain anything except the poorest property. all mineral lying and being in lodes [illegible] crevices concentrated [illegible] large number of such lodes within a small parcel of ground, leaving the balance of the land without any mineral. Probably not an acre in a thousand, if sold in such parcels as described in section *three*, would yield the Government but a *very small revenue*, while the fortunate speculating purchaser would reap a richer harvest than was ever dreamed of by mortal man. Evidently the provisions of this section are for the exclusive benefit of the speculator at the expense of the laborer and Government.

3. The provisions of sections *five* and *six* are so carefully arranged as to deceive those best informed and lead them into the belief that the miner is fully protected, while taken in connection with sections *one* and *two* and the real situation of all our mineral lodes they make it impossible for any miner, particularly if he be a partner with others to hold a single foot of mining property, or even protect himself against monied bidders at a public sale; so that should a miner discover and actually work a claim, the speculator could by a combination with the partner, registrar, geologist, and surveyor, so fix the minimum price as to prevent his purchase of such claim, to the utter ruin of the honest miner by whose discovery the speculator is enriched.

4. That provision of the bill which compels the miner to carry to the mint and have coined at an enormous expense all the gold and silver which shall be taken out, thus preventing him from disposing of the proceeds of his labor to the highest and best bidder therefor, is an outrage upon the rights of man and a tax upon honest labor for the purpose of supporting an extra horde of office holders at large salaries, who like the horse leach forever cry, "Give" "Give"

5. The whole bill in each section of it, if fully carried out, will compel the appointment by the President of officers almost without end, fully enough to eat up all the proceeds of such sales. Nearly all such officers will be men who will have received their appointments through the influence of monied men and to whom they will be indebted in such a degree as to compel them to favor their monied friends at the expense of the miner, contrary to the principle of a Democratic form of government to-wit. That all the officers shall be elected by the people whose servants they are.

*Finally*, our people do not deserve such a terrible punishment as this bill if enacted into a law will bring upon them. When the traitor first raised his sword and aimed a deadly blow at the heart of the republic, no people in all the land were more eager to evince their loyalty than the citizens of Colorado. Regiments were formed and one of the first battles for Liberty and the Constitution was fought by Colorado soldiers.—After that, leaving their homes exposed to the merciless savage, they rushed to the defence of the border states and willingly laid down their lives on the bloody battle fields of Kansas and Missouri. Therefore, in the name and in behalf of the citizens of this portion of Colorado we earnestly protest against the enactment of any such law, for if this bill should become a law and be fully carried out with all the power of the government, a crime of the most heinous character would be committed by the government upon a poor and defenceless portion of its citizens. It would make this Territory forever thereafter, a barren waste, or at best the abode of down-trodden and outraged men, for the exclusive benefit of the speculator and the government official, and without any benefit accruing to the government itself.

Knowing what will be the effect upon this Territory, if said bill shall become a law, we hereby solemnly protest, and as in duty bound will ever protest against the enactment of any such law.

All which is respectfully submitted for the consideration of your Honorable Bodies by citizens of this Union District in Mass Meeting assembled.

J. E LEEPER Pres't.
T. G. MOREHEAD Vice Pres't.
W. W. WARE Sec'y.
J. A. MCPHERSON Ass't Sec'y.

On motion the protest was ordered to be signed by the officers of the meeting and a copy sent to our Delegate in Congress and to one paper in each of the cities of Boston, New York, and Philadelphia, and our [illegible] for publication.

THE Denver *News* coolly proposes to haul the clergy of the city over the coals. It says, "more strenuous efforts are necessary for the salvation of souls!" This is almost as good as its saying the other day, that "it had done much to place Gov. Wm Gilpin in the gubernatorial chair!" Wonders *will* never cease, will they? Oh what a world!

PERSONS wishing to present their friends in the Eastern States with an acceptable present from Colorado, we venture to say could not do better than to subscribe for and send them a copy of the WEEKLY MINING JOURNAL for 1866.

WE have the remainder of the article on mining on the Pacific coast, from the San Francisco *Mining and Scientific Press*, a portion of which we published Thursday, and it is not of enough importance to merit publication.

THE committee on Mines and Mining of the California Legislature have reported to that body a series of resolutions in opposition to the sale of the mineral lands.

THEY have discovered an ink (!) mine in southern California.

**MARRIED,**

At the residence of the bride's father, in Denver, on the evening of the 11th inst., by the Rev. J. B Goodrich Mr. SAMUEL CUSHMAN and Miss INDIANA SOPHIS.

The printers of the JOURNAL hereby tender their compliments, once in the general and particular festivities of the occasion they were not forgotten. May life be both long and pleasant to the tangled couple.

### Items.

—The new Atlantic Cable will be laid in June next by the Great Eastern.

—A terrible tornado struck the town of Pulaski, Tenn., recently, killing several persons and destroying several houses.

—There is no truth in the rumor that Secretary Harlan is about to resign his seat in the Cabinet.

—Freedmen's Savings Banks have been established at Richmond, Wilmington, Savannah, Mobile, New Orleans, Vicksburg, Huntsville, Nashville, Memphis and Louisville.

—The Lawrence Tribune is informed that measures are on foot for the erection, in North Lawrence, of very extensive machine shops, involving the investment of a large amount of capital, and the employment of many workmen. It will be an important addition to the town, and contribute largely to its prosperity.

—What the world calls "innate goodness" is very often a full stomach, and what it terms vice is quite as frequently an empty bread-basket.

—He that is truly polite knows how to contradict with respect, and to please without adulation; and is equally remote from an insipid complaisance and a low familiarity.

—There are 3,612 "whisky mills" in San Francisco, which cost the people more than all the churches and schools in the city.

—A Quaker once hearing a person tell how much he had felt for another who was in distress, and needed assistance, dryly asked him, "Friend, hast thou felt in thy pocket for him?"

—At a concert, recently, at the conclusion of the well-known song, "There's a Good Time Coming," a country farmer got up and exclaimed—"Mister, you couldn't fix the date, could you?"

—A Dutchman being called upon to give a toast, said: "Here ish to de heroes vhat fit, pled, and died at the battle of Bull Run—of which I am one."

—"Pompey, are you willing too be damned, if it is the Lord's will?" inquired a pious friend.

"Oh, yes massa, and more to; I am willin' you should be damned too, massa!" replied Pompey.

—It is reported that Gen. Butler will reply to Gen Grant's "corked bottle" criticism in a speech to be delivered at Lowell, Mass., shortly.

—The total contributions to the National Lincoln Monument Fund up to date, amount to $61,182, 77.

—New York city crowds its population of about a million into 55,000 houses. Philadelphia, with less than seven hundred thousand people, has 100,000 houses.

—Many a man thinks it is virtue that keeps him from turning a rascal, when it is only a full stomach. One should be careful and not mistake potatoes for principles.

—"I should think these omnibus wheels would be fatigued after running all day," observed Sam.

"Well, yes," replied Seth, taking a squint at them, "they do appear to be tired."

—A Parisian doctor has discovered that [illegible]roform, and that it will at once counteract the effects of an overdose.

—It will be seen that the happiest men are also the most miserable. Their capacity for both is greater.

—The boor likes better the breath of his oxen, than the prince the pomatum of his palace.

—To drive a pig, take it by the tail; to please the woman that loves you, displease her first.

—The Paris *Presse* computes the population of the world at one thousand millions, speaking three thousand and sixty-four languages, and having eleven hundred different forms of religion.

---

An experienced [illegible] a lobster when he breaks one of his claws—another sprouting immediately and growing in its place.

---

Mrs. Sigourney is to have a monument erected at Hartford. She has written, it is said, 2,200 poems, during the war, to private soldiers.

---

GLORIFY a lie, legalize a lie, and equip a lie, consecrate a lie with solemn forms and awful penalties, and after all it is nothing but a lie. It rots a land and corrupts a people like any other lie, and by and by the white light of God's truth shines clear through it, and shows it to be a lie.—*Beecher.*

---

ANOTHER GIFT TO GENERAL GRANT.—The New York Stock Exchange appropriated $5,000 as a Christmas present to General Grant. The money is to be added to what is known as the Grant Testimonial Fund, which now reaches $67,000. When $100,000 is subscribed it will be duly presented to the general. The entire amount, it was believed, would be made up before New Year's day.

---

WHAT PROTECTION MEANS.—A cotton goods manufacturing company in one of the New England States has made dividends during the last four years, amounting in the aggregate, to 165 per cent, being an average of 44 1-2 per cent. yearly. It is stated by a reliable New York journal that the present profit of manufacturing cotton is one dollar on every pound of the raw material used.

## MAGNOLIA.

A new toilet delight!
The ladies' treasure!
The gentleman's boon!

The gay world of fashion and elegance is all awake to praise

**Magnolia Water!**

The "Sweetest Thing" in Toilet Water ever discovered.
It cools the heated brow.
It yields a delightful and eternal perfume.
It cures mosquito bites and stings of insects.
It overcomes the unpleasant effects of perspiration.
It removes [illegible], freckles tan, and blotches.
It is pure, refreshing and delicate.
It contains no material injurious to the skin.

Patronized by Actresses and Opera Singers. It is what every lady should have. Sold everywhere. Try it once and you will use no other Cologne, Perfumery, or Toilet Water afterwards.

**P. H. DRAKE & CO., New York.**

N. B.—Be sure every bottle bears these words, "Agua de Magnolia de Barnes." All others are impositions.

## LYON'S KATHAIRON.

Kathairon is from the Greek word "Kathro" or "Kathairo," signifying to cleanse, rejuvenate and restore. This article is what its name signifies. For preserving, restoring and beautifying the human hair, it is the most remarkable preparation in the world. It is now owned and put up by the original proprietor, and is now made with the same care, skill, and attention which gave it a sale of over one million bottles per annum.

It is a most delightful Hair Dressing.
It eradicates scurf and dandruff.
It keeps the head cool and clean.
It makes the hair rich, soft and glossy.
It restores hair upon bald heads.
It prevents the hair from falling off or turning gray.

Any lady or gentleman who values a beautiful head of hair should use Lyon's Kathairon. It is known and used throughout the civilized world. Sold by all respectable dealers.

**DEMAS BARNES & CO.,**
NEW YORK.

HEIMSTREET'S

## Inimitable Hair Restorative,

*OR COLORING.*

Over twenty years' trial has established the merits of this article. It is not an *instantaneous dye* composed of lunar caustic destroying the life of the hair, but by a natural process gradually changes grey hair to its original color. It stimulates a rapid growth of the hair, and frequently restores it upon bald heads. It also eradicates dandruff, and gives the hair a rich luxuriance of rare beauty.

All persons troubled with premature baldness or hair turning grey, should not despair until they have tried Heimstreet. It is sold by all Druggists, at 50 cts and $1 per bottle. The trade can be supplied by my wholesale agents, Messrs DEMAS BARNES & CO., New York.

## Mexican Mustang Liniment.

The parties in St. Louis and Cincinnati, who have been counterfeiting the Mustang Liniment under pretense of proprietorship, have been thoroughly estopped by the Courts. To guard against further imposition, I have procured from the United States Treasury a private steel plate revenue stamp, which is placed over the top of each bottle. Each stamp bears the *fac simile* of my Signature, and without which the article is a counterfeit dangerous and worthless imitation. Examine every bottle. This Liniment has been in use and growing in favor for many years. There hardly exists a hamlet on the habitable Globe that does not contain evidence of its wonderful effects. It is the best emollient in the world. With its present improved ingredients its effects upon man and beast are perfectly remarkable. Sores are healed, pains relieved, lives saved, valuable animals made useful, and untold ills assuaged. For cuts, bruises, sprains, rheumatism, swellings, bites, caked breasts, strained horses, &c. it is a sovereign Remedy that should never be dispensed with. It should be in every family. Sold by all Druggists.

**DEMAS BARNES & CO, New York**

jy1tf Barnes & Jones.

By the following article, which we clip from the U S R R & *Mining Register*, published in Philadelphia, it will be surmised that some *disinterested* gentleman has been sending statistics of the population of Colorado to the Philadelphia *Ledger* as well as the N Y *Tribune*. It is very kind of him, whoever he may be, and the *Territory* if not the State, is quite indebted to him.

VOTES CAST IN COLORADO AND NEVADA.—At the election for Governor, held recently in Colorado, the number of votes cast was 7,457.

At the election held November 7 for member of Congress in Nevada, the aggregate vote polled was 5,907

The *Public Ledger* of December 28, under the caption of "Colorado too fast," complains that, "to give this Territory, with its meagre and shifting population, and its seven thousand votes, a representation in the Senate of the United States equal to that of Pennsylvania with her 400,000 voters, is a mockery"

As the *Ledger*, in its article, bases its idea of population on the number of votes cast at the last election, it will perceive that the total vote of the State of Nevada was 1,550 less than the vote of Colorado

But it is unjust to say that Colorado has a "shifting population," for Colorado contains thrifty and growing towns, and a swelling population of citizen miners, agriculturists, and all the miscellanea of a vigorous young State

The population of Colorado, in 1860, was 34 277 And its present population is very much in excess of that number, notwithstanding that its geographical situation subjected it to hostile incursion during the rebellion, and otherwise imposed drawbacks to its progress But peace is restored in all the States and the exodus of the Indians from the plains, will assure tranquility on the overland route to Denver.

Colorado will be reached and penetrated by railroads now in rapid progress of construction across Kansas, in very short time, for the rivalry between competing railroad corporations to span the plains with trackway, to accommodate the overland transport and transit, is spirited and wide awake, each knowing that the first road opened into Colorado will win a precedence equivalent to a substantial consolidation

Colorado is destined to distinction as a magnificent commonwealth. Its area is 104,500 square miles, which is more than equal to the joint area of Pennsylvania, New York, New Jersey and Delaware Colorado is as big as the country from the Atlantic ocean to Lake Ontario, north and south, and from Ohio to Connecticut, east and west. Its parks and its plains will be put under cultivation, its forests and coal beds contain abundant fuel, its mountains are seamed with lodes rich in gold and silver, the grandeur of the Rocky Mountains like the glory of the firmament being the work of Divine Power.

### California and Colorado's New Senators.

(From the Springfield Republican)

The Far West elected three new United States senators last week, all of whom are to count on the side of liberty and loyalty in our pending and prospective issues Probably they will not understand these terms quite as Mr Sumner and Mr Stevens and such pretended monopol[illegible] of the right way do, but they belong to [illegible] Union party, who have stood by the [illegible] during the war, and they will now help the administration and their associates to secure and fasten the benefits of its victories Mr Cornelius Cole, who comes from California in place of that disgraceful drunkard and copperhead, Mr McDougal, the last of his sort of representatives from the Pacific states, does not take his seat for near two years yet, he is the first senator, indeed, who is chosen for the full term commencing with March, 1867, but he has been in the lower House of Congress for the last two years, and there earned a reputation for intelligence, patriotism, good sense, and practical abilities as a legislator Mr Cole is a lawyer, of modest and pleasant manners, in middle life, a resident of San Francisco, of a fine personal character, and with that best of bonds to society, a beautiful wife and many children Of the many candidates for this senatorship, California might have chosen a man of more brilliant and pronounced qualities, but she could not have selected one more sure to be useful to her interests, more certain to do herself and himself honor than Mr Cole

*The other new senators come from the virgin state of Colorado, and ... take their places ... immediately, or so soon as ... [illegible] ... action, under its own authority, in establishing a state government She has fewer inhabitants, not over 25,000, than it is desirable a state should start with, but with the precedent of Nevada, with no more if not less, and its own statutory act of enabling, Congress cannot set this up as a bar against her admission.* John Evans, the first of these senators, is an old and wealthy physician of Chicago, genial, enthusiastic and intelligent, whom Mr Lincoln sent out to govern Colorado as a territory, and though superseded, through the influence of sharp local and personal enemies, in that place, some months ago, he has compassed his ambition, and comes back to the East a United States senator His colleague Jerome B Chaffee, we only know as a prominent, and, we believe, older citizen of the territory; we think a lawyer, though we hope one of her old and intelligent miners, for a state so wrapped up in the interests of gold mining as Colorado, ought to have such a man, and she has many worthy, to represent her in the first national council chamber She is the first state of the Rocky Mountain region, the first, too, going west, of our precious metal bearing states, and with the rapid progress to her lines of the railroad, and the perfection and introduction of pending improvements in the working of her closely locked gold ores, her population, her wealth and her importance will all be fast multiplied, so just as speedily to outgrow the objection that she is allowed to start as a state with a senator for each ten thousand people, while some of the older states have but one for a million

That all these new senators are of the dominant Union party, the party that elected Mr. Lincoln, and organized anti-slavery into national rule, is but natural, and yet significant. Despite the croakings of some of our politicians and reformers of little faith, the nation is not going back on its record of the last five years Despite the weak strivings of the remnant of the old democratic party, the old game of governing the nation by southern [illegible] and northern office seekers and servants can never be repeated The republic has been emancipated, as well as the slaves, and the old policies the old combinations have passed away. They are ... who ... new forces and new ... tions, and new questions for the organization of future parties, and the securing of future promotion.

# DAILY MINING JOURNAL

**BILL HEADS, PAY ROLLS, NOTES,**—Receipts, Checks, Drafts, Border Cards, Blank Deeds, Power of Attorneys, Justices Blanks, Letter and Note Heads, Envelope Cards, Etc. Every description of Job Work, Plain, Colored and Fancy, executed at this office. Call and examine specimens.

J. P. Wetherman is our only accredited agent for the receipt of subscriptions to the Daily and Weekly Mining Journal, advertisements and job work, throughout Gilpin County. All orders entrusted to his care will receive prompt attention.

July 25th, 1865.

To Whom it May Concern.—The undersigned proprietor of the Mining *Journal*, hereby gives notice that all bills or accounts, contracted from and after this date in my name will be repudiated unless written orders signed by me can be shown as vouchers for the same.

O. J. Hollister.

October 23rd, 1865.

## Local Matters.

SATURDAY EVENING, JANUARY 13, 1866.

Rev. G. B Goodrich of Denver, will preach at the Presbyterian Church in the absence of the Pastor next Sunday morning and evening. Sunday school at the usual hour.

Theo. D. Marsh, Pastor.

Get your ores assayed by Behr & Keith. October 7th 1861. dt

For Sale—The Eagle Bird, formerly owned by Wm. Merchant, which can be seen at the Oak Hall Billiard Room. j9-1w

Champion Billiard Cue for the State of Colorado, on Exhibition at Chaney's Billiard Rooms, Denver. d26tf

Mountain House—Gregory Street, Black Hawk. This house is now open to transient custom, under the supervision of Mr. P. B Wright. It is the intention of the proprietor to make it *second* to none in the Territory. j12-3

Morgan & Congdon have a few more sacks of that extra superfine, "Concordia Mills" Winter-wheat flour, the best in the market—also hay, corn and feed, which they offer at the lowest market price. j8-2w

Fur and quilted hoods, fur caps, all-wool blankets, fancy silks and fine dress goods, will be closed out at low prices to make room for a spring stock. Call at the Great Western, Main Street, Central. j11-3t

Jo. Block has re-opened his Meat and Vegetable Depot in Central, and would be pleased to have all of his old friends give him a call, and as many new ones as may find it convenient so to do. His stalls are well supplied with the best of beef, pork, mutton, venison, and vegetables of all kinds. j9-1w.

The *News* says that steps are being taken to erect a court-house for one in Weld county.

City School.—The number of scholars enrolled during the past month was 118; average attendance, 83.

The telegraph has been down, east of Cottonwood, the entire week. So that we have had no telegraphic news.

The old Kip mill is crushing ore for Mr Rogers of the Bobtail Company. Yesterday they cleaned up sixty ounces.

Crosby & Thompson intend to start their furnace at South Boulder in the early part of next week.

Some of the young fellows have organized a dancing club. They held their first party last evening and had a gay time.

Mr Bissell of the Bissell G. M. Company is mining with encouraging prospects on the Hayman Lode, Casto Hill. He has a very large, open crevice.

Will Teller and Mr Remine may find food for contemplation in a comparison between the Empire memorial published Central, last Monday night, with which they found so much fault.

We have No. 1 of Vol. 3 of the Rocky Mountain Sunday School *Casket*. Its form has been changed and it now appears in quarto form, although quite small. It is well edited, tastily gotten up, and should be encouraged by all means.

Five of the *Gazette* printers have come out in a card, denouncing the editor of that lightning little sheet as a swindler, and requesting the Colorado press to copy. As the card contains nothing new, we trust the printers will excuse us for not publishing it.

Mr. Wm. Nowlan, banker of Montana, got into Denver, recently, bringing a trunk full of gold quartz specimens and $120,000 in dust—Montana is a rich country, but she is a great way off. If it wasn't for the Pacific Ocean, however, doubtless she would one day come to be considered as "down East."

Let us remark the weather. It has been most favorable since last April. We had a sprinkle of snow and a moderately cold snap about the end of October; then mild weather up to the middle of December with no snow. For about ten days thereafter it was cold, with three or four inches of snow, when it came off warm and delightful and has so continued. Surely we have cause for congratulation.

Up to Thursday evening the Legislature had not passed any bills. Among those of most importance introduced and considered were, in the Council, a joint resolution, by Mr. Mitchell, relative to the formation of a mining code; a bill for an act concerning trial for murder and executions, also by Mr. Mitchell; the bill for an act to amend the act providing for the creation of a school-fund, considered; the bill for an act supplementary to, and amendatory of the act incorporating the C. & C. C. Railroad Company; the bill for an act to incorporate the Overland Wagon Road Company, the bill for an act to incorporate the Butterfield Overland Despatch Company; and in the House, a memorial, presented by Mr. Fosher, asking certain action of Congress with regard to the bills before it for the survey and sale of the mineral lands. The House considered several bills in committee of the whole, among them Council Bill No 10, in reference to the subject of gambling.

We can't help noticing an incident, now occurring, by which there hangs a tale with a moral. The Perigo Company have shut down as our readers well know. They have spent, so we are informed, $225,000 and have neither a mill nor any other buildings of consequence, have not ten tons of ore out either, nor their mine in any better shape than when they bought it. Two hundred and twenty-five thousand dollars gone and comparatively nothing to show for it! Such management would disgust a Christian with his religion, if it could enter into it in any way. This vast sum of money has been chiefly expended in huge machinery and its transportation to Colorado from New York. Howell Crushers, which have cost in all little less than $4,000 each, are being broken up and sold for less than $100 for scrap iron, to pay the dishonored drafts of the Company's Colorado agents. Verily the fewer of such institutions we can have the better for us. We rejoice that they have shut down and sincerely hope they will sell out. It would be impossible for one of the most valuable properties in Colorado to fall into worse hands.

There is considerable excitement in Nebraska on the question of state organization. All the papers are discussing it. Among those who favor it strongly are the *Nebraska Republican*, published in Omaha, and the *Nebraska Advertiser*, published at Brownville. The *Nebraska Herald*, published at Plattsmouth, favors the movement on general principles, but advises its readers not to commit themselves on either side of the question, until they shall have concluded whether a representation of Nebraska in Congress would conduce to the railroad interests of Plattsmouth or Omaha. The *Southern Nebraskian*, published at Falls City, favors state organization, but does not want the Legislature to inaugurate the movement. It would have an Enabling Act. The *People's Press*, published at Nebraska City, says that the success of the measure depends upon how it comes up and upon the merits of the constitution presented. These are Republican journals. The *Nebraska Register*, published at Rulo, and an independent sheet, is silent upon the subject.—The *Nebraska City News*, the *Omaha Herald*, and the *Nebraska Times* (Bellevue) all Democratic in politics, bitterly oppose it. Meanwhile a petition is being widely circulated, and signed, praying the Legislature to make a constitution and submit it to the people for ratification.—The success of Colorado in the same direction seems to have roused our fellow-miners of Nebraska.

Lyon.—Mr Johnson of the smelting works, stopped in a few moments, last evening, and quite reassured us with regard to their operations. They are getting along just as fast and as favorably as they expected. Their enterprise is a huge one and they are pioneers, and only those who have tried it can imagine the difficulties which spring up on every hand to obstruct such enterprises. They seem, here, to have been scrimped for water, a difficulty now mostly overcome. Their blast cylinders do not work well, and it is possible they may have to put in blowers. Their furnace capacity was out of proportion to their ore dressing machinery. The buddle for pyrites was started yesterday, and the jiggers for lead ores are being added to. Their crushing machinery was not at hand, and they have had to pick it up wherever they could. It is now assuming a tolerable shape. Their first tests froze during the cold snap of last month, and became imperfect. For the most of their labor, it has first to be taught, and here again is a great source of detention. With the newly arrived and shortly to arrive from their former works on Staten Island, however, this difficulty will soon be overcome. The public are familiar with the fact that in building these works, they were at first badly disappointed in the make of their fire-brick, and that they have proved what was only believed—that Colorado has both the material and skill for as good an article of fire-brick as is made in the world. We mention these things to satisfy the impatience of the [illegible] and also to give foreigners an idea of how detentions inevitably arise in the inauguration of such enterprises.

But they are well satisfied with their success. The result, so far, has precisely justified their expectations and estimates. Their Scotch Hearths (with a proper blast) are equal to the production of 2½ tons of metallic lead a day. Their reverberatory furnaces work well. They were started just about Christmas and one of them has already made its bottom; that is to say, absorbed from twenty to thirty tons of lead, and the charges begin to run off with due regularity and freedom. The other one is going through the same process favorably. One cupel furnace has been running a few days; the other is ironed and ready to start as soon as it is needed. So far, beyond lead ores, they have only used Gregory tailings, and their first button indicates about $100 a ton as the value of the material treated. Mr. Johnson thinks they have out already, in available shape, eight or ten thousand dollars' worth of bullion, and that they will henceforth be able to meet their expenses without drawing on anybody. The entire works will doubtless consume not far from twenty cords of wood per day. This, at seven dollars a cord would amount to $50,000 a year. The Gould & Curry mill and mine in Nevada consume 13,000 cords a year, worth $15 a cord—$200,000. No large mining works can be carried on without expense—the question is, will the profits of the business warrant it. The average yield of the Savage Company's ores (state of Nevada) for 1864 was $44 per ton, the cost of mining and reduction, 80 per cent. The average yield of all the Comstock ores is not far from $40 per ton, the cost of mining and reduction, about $32. The average yield of all ores (dressed) that will ever be smelted at Lyonsville will not, it is safe to say, fall below $100 per ton. The cost of reduction—the smelters do not propose to mine—will certainly not exceed $30 a ton. Now, suppose they purchase their ores at an equal cost—thirty dollars, which would leave at least a profit of twenty for the miner—they have still a clear profit of $40 a ton. We believe the result, through the coming years, will more than justify these figures. We are glad to be able to state that Lyon's works will be duplicated as soon as possible, and that other parties are already preparing to follow in his wake.
